## EXPERIENCE

### *Senior Software Engineer, Aloft Ed. Inc.*

Remote — 07/16 - 10/17

Being half of the engineering team I got to wear many hats, primarily on the front-end codebase.

#### Accomplishments

- Developed an internal data visualization library using D3.
- Designed and implemented data authoring tools using React.
- Collaborated on the company's roadmap and vision.

### *Senior Software Engineer, Floship*

Hong Kong / Remote — 03/15 - 06/16

As part of a small engineering team, I worked as a full-stack engineer developing the company's user-facing application; as well as automating some of the operational needs.

#### Accomplishments

- Designed and executed a scalable front-end architecture for a single page application using Marionette.js and Django Rest Framework.
- Automated orders' approval and packaging processes.
- Integrated third party services such as Braintree and 3DBin.

### *Participant, The Recurse Center*

New York, USA — 10/14 - 12/14

The Recurse Center is a free, self-directed, educational retreat for people who want to get better at programming. I focused on improving my backend skills by writing some Node.js packages.

### *Software Platform Engineer, NetSuite Inc.*

Montevideo, Uruguay — 06/12 - 09/14

Developed NetSuite's SuiteCommerce Advanced platform, a large Backbone.js application with its own RESTful API.

#### Accomplishments

- Implemented several of the core modules. They required unit tests, documentation and knowledge transfer.
- Led a five person team in charge of developing enhancements and new features.
- Traveled to Oklahoma City to train a team of four engineers from an acquired company.

### *Web Developer, SuiteCommerce*

Montevideo, Uruguay — 07/09 - 06/12

Developed highly customized eCommerce stores, catering to client specific business requirements.

## SKILLS

**Proficient** in the vanilla web stack: HTML, CSS and JavaScript.

**Strong knowledge** on libraries such as jQuery, Backbone, Underscore, React and D3.

**Good understanding** of E-commerce, working on REST APIs, Scrum agile methodology, performance best practices, SMACSS and responsive web design.

**Certificate in Advanced English** by Cambridge English.
