EXPERIENCE

Senior Software Engineer, Floship

Hong Kong / Remote — 03/15 - Present

As part of a small engineering team, worked as a full stack engineer developing the company's user facing application; as well as automating some of the operational needs.

Accomplishments

- Designed and executed an scalable front end architecture for a single page application.
- Automated order's approval and packaging processes.
- Wrote integrations with multiple third party services.

Software Platform Engineer, NetSuite Inc.

Montevideo, Uruguay — 06/12 - 09/14

Developed NetSuite's SuiteCommerce Advanced platform, a large Backbone.js application with its own RESTful API.

Accomplishments

- Developed several of the core modules. They required unit tests, documentation and knowledge transfer.
- Led a five person team in charge of developing enhancements and new features.
- Traveled to Oklahoma City to train a team of developers from an acquired company. The goal was to help them dive into our platform and build a CMS prototype on top of it, which we successfully did.

Web Developer, SuiteCommerce

Montevideo, Uruguay — 07/09 - 06/12

Developed highly customized eCommerce stores. This included wishlists, rating/review systems, multi-step product configurators and client specific business logic.

SKILLS

Proficient in the vanilla web stack: HTML, CSS and JS.

Strong knowledge on libraries such as jQuery, Backbone, Underscore and pre-processors Grunt and Sass.

Good understanding of E-commerce, working on REST APIs, Scrum agile methodology, front end performance best practices, SMACSS and responsive web design.

Accomplishments

- Developed several "bundles", i.e. reusable data structures and code to be installed in our customer's accounts.
- Traveled to Chicago to train the people that would do the maintenance for one of the sites I developed.
- Traveled to San Francisco as SuiteCommerce's technical lead for SuiteWorld, NetSuite's yearly customer gathering.
